Are you any of you aware of a LiDar or NASA flight that we have planned for the tailing dump from Gold King?

Chris,

Can you take a look at this and let me know what you think? I know that you guys had a LiDar and/or NASA flight scheduled at some point to view the tailings dump from Gold King. May be we could expand on that? have San Juan County formalizing the request so that we understand the scope.

Thanks!

-Trevor

Trevor and David,

Nathan Lowry with OIT GIS received a request for help from San Juan County regrading needing help locating mining claims. LiDar could help with this. EPA may have acquired LiDar. There is also a possibility to get some imagery from NASA next Wednesday as part of another project Nathan is working on, I am guessing this would come with a cost.

As soon as possible, Nathan is looking for a contact that he could confirm whether LiDar was acquired for Cement Creek and if San Juan County could use it. We know the EPA had a few GIS contractors working for them on the incident. I am not sure if these would be the correct contact. Nathan needs this as soon as possible, due to the possibility of having to coordinate with NASA to acquire additional data on Wednesday.

On another note, San Juan County is looking for some GIS assistance, sounds like related to the event. Some discussion should to be had on this between San Juan County, COEM, and OIT/GIS. This part of the discussion could wait till Monday.

Nathan contact information is

Nathan Lowry, GIS Outreach Coordinator

nathan.lowry@state.co.us

P 303.764.7801

Thanks,

Drew

Nathan,

Should we be budgeting something for your office on this project? We have a finance meeting between the County and EPA this morning.

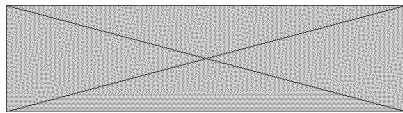

Sounds like EPA has probably already acquired LiDar - mentioned in one of their situation reports. I am hoping that Drew Peterson knows about it. Otherwise I will try to find out a GIS contact person on this incident.
